**Graduate Certificate
in Biofabrication**

Study online

uow.info/biofabricationonline

LEARN HOW TO BUILD A BODY. FROM SCRATCH.

Advances in 3D bioprinting and materials technology have us rapidly approaching the day when every hospital in Australia will be capable of printing living cells into a new functional human organ, or printing a specialised instrument for surgery, on-demand.

The Graduate Certificate in Biofabrication is a practical online course designed for professionals currently working in the fields of science, health, engineering and technology, as well as those who want to pursue a career in biofabrication.

Learning from some of world's foremost experts on 3D printing, bioprinting and electromaterials science, you'll gain a broad understanding of the theory that underpins 3D printing technologies and biomaterials. You will also develop a practical and technical skillset by preparing your own designs, before watching a live stream of them being printed at UOW's ARC Centre of Excellence for Electromaterials Science.

AUSTRALIA'S LEADING MATERIALS RESEARCH CENTRE

UOW's ARC Centre of Excellence for Electromaterials Science (ACES) is Australia's leading research centre for materials science and device fabrication. ACES incorporates six Australian collaborators and five international partners, representing some of the best researchers, clinicians and academics in the world to learn from.

ALUMNI SCHOLARSHIP

The UOW Alumni Scholarship is a 10% fee waiver available to any domestic or international UOW Bachelor graduate who is looking to study a Postgraduate coursework degree.
