## **Head of Laboratory - New York, NY, USA**

IVAX BIO, LLC, based in New York, NY, and its Moscow, Russia, R&D subsidiary, 3D Bioprinting Solutions, focus on 3D bioprinting and work on the whole range of the hardware, materials, technologies, and products comprising the 3D bioprinting industry. We are opening a new lab in New York and adapt our existing platform technologies for cellular agriculture applications focusing primarily on cell-based cultured meat/fish project.

We are seeking a Head of Laboratory who will lead these efforts at our new lab.

Job type: Full-time position.

Location: New York, NY.

Key requirements:

- Experience with 3D cell culture
- Scale growth and production of established cell lines to manufacturing levels
- Knowledge of bioreactor technology
- Academic background in Cell Biology, Life Sciences, Biotechnology, Bioengineering or related field with 2+ years of work experience
- Experience managing 3+ scientists
- Experience with biomaterials fabrication and characterization

Additional qualifications & experience:

- Experience with food technology
- Experience with additive manufacturing technologies (3D printing)
- Exceptional attention to detail and organizational skills
- Goal orientated, motivated, and able to work independently
- Strong planning and execution skills.
- Strong written and oral communication skills.
- Ability to accurately document, critically analyze/interpret data and communicate the results promptly.
