

Biography: Dr. Daniel Chen is currently a Professor with the Department of Mechanical Engineering and Division of Biomedical Engineering at the University of Saskatchewan (USask), Canada. Prior to his appointment with at the USask in 2003, he received his PhD from USask in 2002 and then worked as a post-doctoral fellow at Queen's University, Canada. Dr. Chen's research interests mainly include biofabrication and tissue engineering. His research has been supported by both engineering and health research agencies and has had >220 papers published or accepted for publication in journals with >10 in *Biofabrication*. Dr. Chen is a Fellow of the Canadian Academy of Engineering (CAE) and Engineering Institute of Canada (EIC). He has been a Board Member of International Society of Biofabrication (ISBF) since 2019 and is the Conference Chair of the 2023 Biofabrication Conference being held in Canada. For more information on Dr. Chen, please link to: <https://researchers.usask.ca/daniel-chen>."

Motivation Statements: As a Board Member of International Society of Biofabrication (ISBF), I will utilize my extensive volunteer and academic experience to promote advances in biofabrication research, development, education, training, and medical and clinical applications. Particularly, I will devote myself to (1) grow/retain the ISBF membership in Canada and around the world, (2) build/strengthen the connections between members and ISBF to support members' activities, meanwhile helping on the ISBF success, (3) help/assure that the ISBF conferences and publications are of success and high quality, (4) increase ISBF visibility to government, non-government organizations, and the public for awareness and education in biofabricaiton and its applications, (5) build/expand partnerships with academia, government, industry, other not-for-profit organizations and professional societies who share the interest in biofabrication to better address the future needs of ISBF, meanwhile enhancing the advances in biofabricaiton.
